Bleu lagon, rouge éternel, jaune poussin.. Il est parfois difficile d'avoir un langage commun dans la manière de désigner les couleurs qui parent notre environnement. Le RAL, sigle de l'entreprise allemande **Reichsausschuß für Lieferbedingungen** (Comité national pour les conditions de livraison), a permis depuis 1927 de créer un répertoire des différentes couleurs. Cela permet en particulier à ce qu'une couleur demeure la même qu'elle que soit son fabricant ou son utilisateur. Pour nous faciliter la vie, voici les RAL les plus fréquents.
